Email: nixrobinson@gmail.com

Interactive and motion graphic designer, possessing significant web development and video editing experience. I have over two years industry experience working in digital design for advertising and digital agencies.

EXPERIENCE

Nexus/h - Digital Designer (Sept 2009 - present)

Interactive designer and developer working with a small digital team on integrated campaigns. Work includes projects at conceptual stage right through to final production, including extensive web design and development. Responsible for editing and animating the majority of the agencies videos for clients, agency marketing and pitches. Main clients include Suzuki, Hitachi and Cunard.

Liquid Digital - Creative Designer (August 2006- August 2007)

A placement year as part of my Digital Art & Technology BSc (Hons) degree. Role included working independently and as part of close knit team. Primarily I engaged in designing and animating content for digital display screens for WHSmith stores in the UK, using Avid Editing suite and After Effects. Other projects include working for clients such as IBM, Cabvision and Motorola.

Sheppard Day Advertising (June 2002)

I spent time at Sheppard Day gaining valuable knowledge about the industry, briefly working in all parts of the agency in particular design and editing. This is when I became interested in advertising and inspired want to work in the field.
